

# Museum of Natural Sciences

## C.Adler

On this camp out we were able to visit the Museum of Natural Sciences in downtown Raleigh. It was very cool. The museum had many floors displaying some of the latest natural science discoveries and some of the old discoveries.

In the middle of the visit we were able to go to lunch in the daily planet cafe or in the Acro cafe. The new section had the newer discoveries and the daily planet cafe and the older section had the older discoveries and the Macro cafe.

Outside the building, next to the bridge connecting the two sections of the museum of natural science, there is a big globe that shows the whole world.
